Design and inspiration

The Fibra Basket, a design by Sebastian Herkner, makes everyday life a little more beautiful. You can use the basket, available in three sizes and four colours, as a fruit bowl on the dining table, a tray for keys and mail in the hallway or to store towels neatly in the bathroom.

About the designer

German designer Sebastian Herkner is a long-term collaborator of ames and has visited Colombia multiple times to experience the country's cities, nature and people first hand. He also visited many of the ateliers that ames has partnered with to learn about the unique traditional crafts of Colombia's regions. A sought-after contemporary designer and recipient of many industry awards, he has worked with many international design brands, creating intriguing pieces that showcase his intuition for interesting material, colour and texture combinations.

Craft and manufacturing

Each basket is handwoven in Colombia using Esparto grass. This grass grows wild in the Colombian highlands, starting from an altitude of 2,600 meters. After it's cut, the grass is dried and dyed, using mainly natural pigments. Just this preparation of the grass takes seven days, while the actual weaving is done in three to six days, depending on the size of the basket.

Care instructions

Protect from damp conditions and only use indoors. Use a slightly damp cloth to clean the product.
