Design and inspiration

The elegant Victorias Coffee Tables infuse any room with a subtle tropical flair. Designed by Cristina Celestino, the circular frame and V-shaped gap in the tabletop's raised edge are inspired by the up to three meter large leaves of the enormous water lily *Victoria amazonica*.

The powder coated steel tables are available in three different sizes and four colour combinations, featuring a colour contrast between table top inside and the body. The two larger models can be turned into a pouf with a fitted cushion whose cover is woven from the leaves of the Cumare palm.

About the designer

Cristina Celestino is one of the most prolific contemporary Italian designers. Her product and interiors share a softness, often defined by curved lines, a love for pastel hues and subtle links to Italy's rich design heritage.

Celestino graduated from the School of Architecture at IUAV University of Venice in 2005 and started working as an interior and furniture designer. In 2009, she moved to Milan, a city whose art, architecture and history offer her constant inspiration. Since 2013, she runs her own design studio, in addition to her brand Design Attico. Cristina Celestino collaborates with brands from all over Italy and Europe. Her designs always reflect the unique heritage and character of these companies.

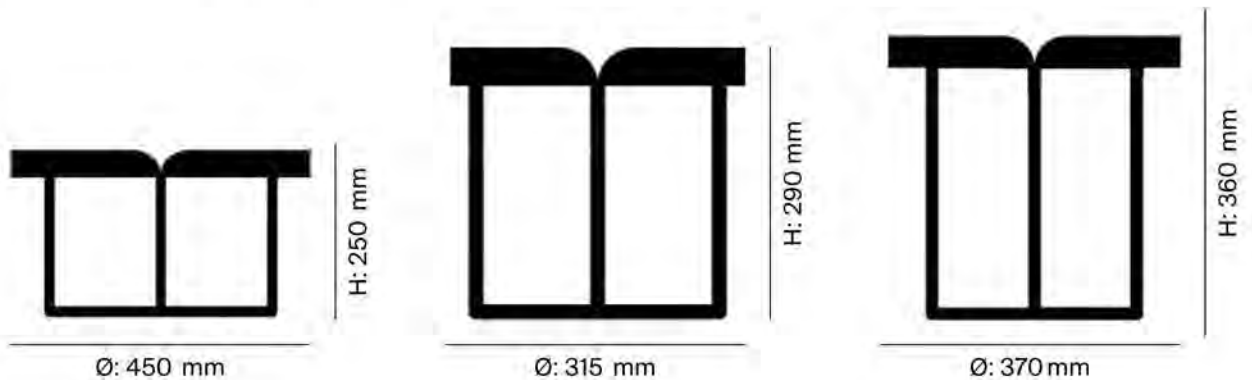

Her contributions to the design world have been recognised by many international prizes and awards, including the Special Jury Prize in the "Salone del Mobile.Milano Awards" (2016). She's also repeatedly won the Elle Deco International Design Award in the category Wallcovering.

Craft and manufacturing

Each table is made by hand in our partner workshops in Colombia. The steel is fire-galvanised before being powdercoated. The production of one metal table takes 13 days and for the version with cushion 22 days.

Care instructions

The tables are water-resistant, but the colour might change if left repeatedly in the rain. Use a damp cloth and extra soapy water to clean the metal parts. The cushion should not get wet.
