Design and inspiration

A special place for your special items: Lazo, meaning bow in Spanish, is a charming collection of compact wall shelves providing sophisticated storage for selected objects. For the first time, ames collaborated with designer Charlotte Lancelot, who looked at one of the key materials in the ames collection, recycled PVC strings, exploring new ways of using them to craft outstanding design pieces. She came up with a simple, appealing frame featuring curved corners holding a tight, hand-woven webbing made with cords in vibrant colours, creating eye-catching patterns.

Charlotte studied the traditional weaving and braiding techniques the artisans in the Colombian ames ateliers have mastered. In close partnership with local craftspeople, she and ames developed a new technique to make the intricate structure of the Lazo shelves.

The Lazo shelves come in three sizes, allowing for the models to be mixed and matched on the walls to display objects of different sizes. They can be mounted to walls in all environments, including bathrooms or spas, as the powder-coated metal frame and the PVC strings won't be affected by humidity.

About the designer

Charlotte Lancelot is a product and textile designer based in Brussels. She creates objects that play with abstract shapes, optical illusions, and innovative materials. She studied at the Industrial Department of the Ecole Nationale des Arts Visuels de la Cambre in the Belgian capital. In 2005, she started her own studio and was chosen to curate the Milan Design Week exhibition by Wallpaper magazine just a year later. Charlotte has worked with international brands, including GAN Rug, and has been teaching at the National School of Arts ESA St Luc Brussels since 2008.

Craft and manufacturing

Each Loza shelf is handmade in ames ateliers in the Colombian capital Bogota. The skilled artisans weave the PVC cords by hand around the powder-coated metal frame, using different, complex techniques to create the stunning webbing. It takes them four to five days to complete one piece.

Care instructions

Wipe clean with a damp cloth (do not use scratchy materials like a steel scourer) and gentle soap. You can also hose them down with water. To protect the colours, avoid exposing the product to direct sunlight over long periods and store indoors during winter. Fitted cover sold separately. If the product is exposed to sea air, wipe the frame regularly with a damp cloth.
