Design and inspiration

The Dichas Hanging Planters give every room plant an extraordinary home. Their vibrant colours and large sizes give them an air of extravagance, while their beautifully woven details add a playful touch.

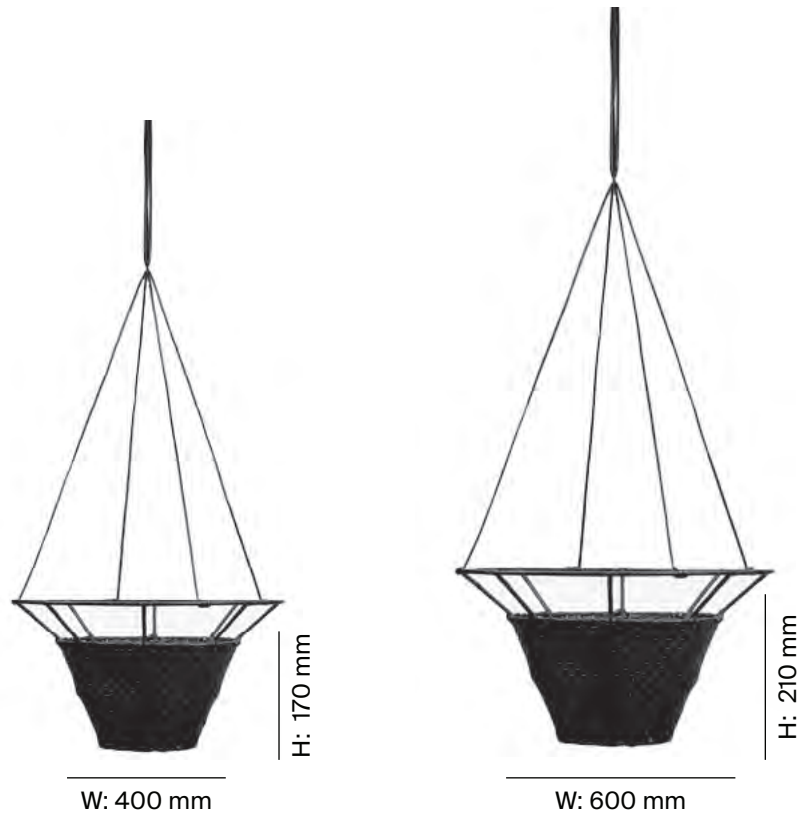

Ames developed this collection with Cristina Celestino. The Italian designer was not only influenced by the traditional flower baskets popular in Colombia but also studied the hanging gardens César Manrique built on Lanzarote.

About the designer

Cristina Celestino is one of the most prolific contemporary Italian designers. Her product and interiors share a softness, often defined by curved lines, a love for pastel hues and subtle links to Italy's rich design heritage. Celestino graduated from the School of Architecture at IUAV University of Venice in 2005 and started working as an interior and furniture designer. In 2009, she moved to Milan, a city whose art, architecture and history offer her constant inspiration. Since 2013, she runs her own design studio, in addition to her brand Design Attico. Cristina Celestino collaborates with brands from all over Italy and Europe. Her designs always reflect the unique heritage and character of these companies. Her contributions to the design world have been recognised by many international prizes and awards, including the Special Jury Prize in the "Salone del Mobile.Milano Awards" (2016). She's also repeatedly won the Elle Deco International Design Award in the category Wallcovering.

Craft and manufacturing

Artisans in the ames partner workshops in Bogota, the capital of Colombia, weave the PVC strings, which are made from recycled plastic, around a powder-coated tubular steel frame. The weaving technique the artesanos and artesanas use is called Momposino, a traditional Colombian method to create intricate patterns. Our artisans work on one piece for around 13 days.

Care instructions

Wipe clean with a damp cloth (do not use scratchy materials like a steel scourer) and gentle soap. You can also hose them down with water. To protect the colours, avoid exposing the product to direct sunlight over long periods and store indoors during winter. If the product is exposed to sea air, wipe the frame regularly with a damp cloth.
