Design and inspiration

The Caribe Dining Table is an elegant design for in- and outdoor seating arrangements. Part of the Caribe series designed by Sebastian Herkner, the table features a striking base decorated with PVC strings and a powder-coated metal tabletop. The German designer visited Colombia together with ames founder Ana Maria Calderón Kayser and translated the vibrancy and spirit of the country's people and traditions into joyful, modern furniture pieces defined by clean lines, strong colours and the hand-woven webbing.

About the designer

German designer Sebastian Herkner is a long-term collaborator of ames and has visited Colombia multiple times to experience the country's cities, nature and people first hand. He also visited many of the ateliers that ames has partnered with to learn about the unique traditional crafts of Colombia's regions. A sought-after contemporary designer and recipient of many industry awards, he has worked with many international design brands, creating intriguing pieces that showcase his intuition for interesting material, colour and texture combinations.

Technical Specifications

Dimensions (mm)

Height: 750,
Tabletop: Ø 1300, 4 thick

Packaging dimensions

(H x W x D) (mm)
1400 x 1400 x 1000

Item weight (kg)

50

Craft and manufacturing

Each table is made in Santa Marta, a city on the Caribbean coast of Colombia, by local craftspeople. They weave the PVC strings, which are made from recycled plastic, around the tubular steel frame of the base. The weaving technique the artesanos and artesanas use is called Momposino, a traditional method known for intricate patterns. Just the preparation of all the materials takes ten days, while the production of each table takes three days.

Care instructions

Wipe clean with a damp cloth (do not use scratchy materials like a steel scourer) and gentle soap. You can also hose them down with water. To protect the colours, avoid exposing the product to direct sunlight over long periods and store indoors during winter. Fitted cover sold separately. If the product is exposed to sea air, wipe the frame regularly with a damp cloth.
