Design and inspiration

The Caribe Chic Basket is an elegant design by Sebastian Herkner and can be used indoors and outdoors as a storage unit or planter. It's part of our Caribe Chic collection, featuring an intricate hand-woven webbing in contrasting earthy, muted shades. The pieces and colours are inspired by the incredible nature of the Colombian Huila region, where the serene Tatacoa desert meets the powerful Rio Magdalena.

About the designer

German designer Sebastian Herkner is a long-term collaborator of ames and has visited Colombia multiple times to experience the country's cities, nature and people first hand. He also visited many of the ateliers that ames has partnered with to learn about the unique traditional crafts of Colombia's regions. A sought-after contemporary designer and recipient of many industry awards, he has worked with many international design brands, creating intriguing pieces that showcase his intuition for interesting material, colour and texture combinations.

Craft and manufacturing

Each basket is made in Santa Marta, a city on the Caribbean coast of Colombia by local craftspeople. They weave the PVC strings around the powder-coated tubular steel frame, which are made from recycled plastic. The weaving technique the artesanos and artesanas use is called Momposino, a traditional method known for intricate patterns. Just the preparation of all the materials takes ten days, while the production of one basket takes three days.

Care instructions

Wipe clean with a damp cloth (do not use scratchy materials like a steel scourer) and gentle soap. You can also hose them down with water. To protect the colours, avoid exposing the product to direct sunlight over long periods and store indoors during winter. Fitted cover sold separately. If the product is exposed to sea air, wipe the frame regularly with a damp cloth.
